

Pathways

The LORD says, “I will guide you along the best pathway for your life. I will advise you and watch over you. Psalm 32:8 NLT

Pathways

Proclaiming Christ...Promoting project-based learning...Protecting the environment...Practicing service

Our Mission.....

To deliver a Christ-centered, quality academic program that emphasizes project-based learning in partnership with our families and communities.

Our Vision.....

To develop students who...

- Care deeply about their faith, and desire to grow in their wisdom and knowledge of the Bible and our Lord Jesus Christ, and strive to glorify God in all they do.
- Display Christ-honoring character traits.
- Are prepared to defend the Christian faith and stand for biblical truths.
- Demonstrate compassion, respect, and honor for all people within the school community and beyond.
- Are well prepared to pursue their calling, whether it be entering the workforce, further education, missions, or service arenas.
- Are lifelong learners, curious, and excited about the world they live in.
- Are motivated to pursue excellence and develop a strong work ethic in all areas of life.
- Are productive citizens, willing to engage in their community through leadership and service.
- Are reflective, critical thinkers, and creative problem solvers.
- Are not afraid to ask questions and make mistakes.
- Respect and care for God’s creation and make choices that promote stewardship of the environment and the world in which we live.

We believe that learning should.....

- Point to the Creator.
- Be relevant and purposeful.
- Develop the whole child; spiritually, intellectually, socially, emotionally and physically.
- Be active rather than passive. Students learn best “by doing” and by engaging in first-hand experiences.
- Involve student choices and decision-making concerning their educational interests.
- Involve adults who care about students, are positive role-models, and provide constructive feedback and guidance.
- Encourage group activities that promote teamwork and communication.
- Be joyful and fun.

We believe in educating by

- Developing individualized learning plans tailored to support and encourage each student’s unique gifts, skills, interests, and learning styles.
- Presenting students with real-life problems and projects that will necessitate critical thinking, research, problem-solving, design, communication, and execution.
- Providing a foundation of academic skills.
- Challenging students with high standards, and providing the tools and encouragement for success.
- Immersing students in outdoor studies. Children learn best when they have plenty of physical activity, sunshine, and fresh air. (D. Bell, 2018)
- Engaging students in their communities through volunteer opportunities and civic participation.
- Developing lessons and projects that are interdisciplinary.
- Immersing students in projects and activities that provide real-world relevance.
- Providing students with opportunities to be both learners and teachers.

- Providing educators who learn alongside their students; guiding, facilitating, and modeling as opposed to solely dispensing information.
- Integrating Biblical truths through all subject matter.
- Safely utilizing technology to find resources, create products, and connect with experts and audiences around the world.
- Focusing on project based learning which allows students to work on real-life, hands-on projects that are relevant, applicable, and fun.
